Amazon AWS Certified Developer - Associate (DVA-C02)	Oct 2024
Amazon AWS Certified Cloud Practitioner (CLF-C02)	Oct 2024
Pega Certified System Architect (PCSA 8)	Jan 2020

PROFESSIONAL EXPERIENCE

Oracle India [Application Developer] July 2017 - January 2020

As an application developer, I have developed and enhanced multiple stories to implement end to end web application feature and deliver it as part of version releases. Responsibilities :

- To understand the specifications given and to prepare a workflow model for implementation.
- To implement stories in efficient, time saving way and integrate them into application.

Pegasystems Worldwide India [Cloud Development Engineer] January 2020 - December 2021

As a developer, I have worked on developing internal frameworks such as pega units, scenario testing framework and deployment manager. Responsibilities :

- To implement stories of product owner in efficient way and integrate them into framework.
- To have a good understanding on the framework and avoid affecting the existing functionalities.

Zuora India [Software Engineer III] January 2022 - Present

As a developer, I build and manage data integration module between Zuora Revenue and Dynamics 365 in Azure Data Factory pipeline with ARM template and UI, backend management. Responsibilities :

- To implement error free data transaction pipeline and manage them for customers.
- To work with customer in understanding their needs and provide solutions with backward compatibility.

PROJECT DESCRIPTION

Oracle

P6 Web delivers solutions to manage projects, resources, risks and funds by employing project portfolio management. Project Managers can assign activities, track the progress, manage the works and schedule assignments. **P6 TeamMember** enables the resources to see the activities assigned on their names along with other details about the assignments and plan accordingly to start working on them.

Pegasystems

Pega units and **scenario testing** are internal frameworks of pega which is used by pega developers for assessing the quality of the low code development. **Deployment Manager** is a tool used by various application developers to manage CI/CD flows of their development works.

Zuora

Zuora Revenue is a revenue recognition application with complex accounting features and based on innovative subscription model. **Data Connector Hub** enables data transaction between Zuora Revenue and other ERP systems with fail proof capability and detailed transaction entries.

EDUCATIONAL QUALIFICATION

BE ECE, PSG College of Technology

July 2013 - May 2017

Grade Points : 8.48

MBA PM, Alagappa University

June 2022 - May 2024

Grade Points : 7.45 (Distance Education)

PERSONAL DETAILS

Date of Birth	:	January 20, 1996
Gender	:	Male
Nationality	:	Indian
